**8.** Pursuant to article 5 of RJEC, the selection is to be made based on the evaluation of the scientific and curricular career of the candidate.

**9.** Scientific and curricular career evaluation focuses on relevance, quality and up-to-datedness of:

- a)** Scientific production, considered most relevant by the candidate;
- b)** The research activities in fundamental and applied science, including coordination and participation in research funded projects, considered most relevant by the candidate;
- c)** Knowledge extension and dissemination activities, namely under the scope of the promotion of culture and scientific practices, deemed most relevant by the candidate;
- d)** The experience in training and qualification of Human Resources, including the supervision of students (first, second and third cycles studies), as well as participation in juries of academic degree examinations.

**10.** Evaluation criteria are the following:

**10.1** Integrated assessment of the curriculum trajectory of the candidate, based on an overview of their scientific merits, namely:

- I.** Overall scientific coherence of the CV – 10%;
- II.** Diversity and quality of scientific indicators, including relevant published peer-reviewed articles and book chapters, in the specific areas indicated in points 1 and 7 – 20%;
- III.** Coordination and participation in scientific projects with competitive funding – 10%;
- IV.** Experience in advanced training and qualification of Human Resources, measured by the teaching experience in Higher Education institutions, by the supervisions of students (first, second and third cycles studies), as well as participation in juries of academic degree examinations – 10%.

**10.2** Relevant experience, proved in CV, in:

- I.** In vitro assays for the evaluation of biological activities of natural and synthetic compounds, namely anti-inflammatory and anti-diabetic activities – 20%;
- II.** Isolation and in vitro assays with human primary cells as neutrophils and monocytes – 20%;
- III.** Enzymatic kinetics and the establishment of structure activity relationship of natural and synthetic compounds – 10%.

**11.** In the case of admitted candidates whose evaluation does not differ more than 10% from that obtained by the best positioned candidate, the jury will interview the best positioned candidate and the candidates in this situation. This will be aimed at obtaining clarifications and explanations about the curricular elements and additional information as well as to evaluate the attitude profile and motivation of the candidate.

The final score of each jury member is obtained by the following assessment: 90% scientific and curricular career evaluation and 10% interview.
